Subject: CES:

Leroy:

It is my understanding that you are sending the vac boxes to TIBM and then having them returned back to the site and then having Dynamic/Adler picking the boxes up at the site. We discussed this prior to my vacation last week and I told you that I wanted the boxes to be cleaned and the rental company to pick them up at TIBM. I told you that I did not want to pay extra transportation.

The way you are doing this (if box is on site):

Transport from Site to TIBM

Return Back to Site from TIBM (extra transportation not needed)

Pick up from Site by Rental Company

The way you are doing this (if box is on site):

Transport box to disposal facility (disposal facility does cleanout);

Transport box to Site; (extra transportation not needed)

Transport box to TIBM for cleaning (TIBM responsibility is to make sure box is acceptable for return);

Transport box to the Site; (extra transportation not needed)

Transport box to Rental Company;

The way it should be done (If box is onsite):

Transport box to TIBM for cleaning (TIBM responsibility is to make sure box is acceptable for return);

Transport box to Rental Company

The way is should be done (if box is being sent for disposal):

Transport box to disposal facility (disposal facility does cleanout);

Transport box to TIBM for cleaning (TIBM responsibility is to make sure box is acceptable for return);

Transport box to Rental Company;

I suppose we need to discuss this again and the reason that you are doing this.

Thanks
